

# 3<sup>rd</sup> Grade Science Space and Technology!

November –December 2012

Hello again! Lets get this marking period started with some fun. This past marking period we learned all about the inner planets and the outer planets. We will continue learning about the planets and then learn about technology and the technology we see in our homes today.

We will be learning about how Earth can support life and some of the patterns that we find in the planets. We will begin to learn about some famous astronauts and what they did.

We will begin discussing about technology and what it is, we will research new technology and discuss the technology we use everyday.
