

Earth Science!

3rd Grade Science

November

Hello again! Welcome to Earth Science! Lets get this marking period shaking. We just learned about different types of rocks and soils. In this marking period we will be learning about earthquakes and volcanoes. We will also be discussing different ways we can help our environment everyday by using the 3 R's.

Students will learn about what creates an **earthquake** and how **lava** erupts from a **volcano!**

We will also be learning about earth's different **resources** and how to protect them. We will be learning and discussing different ways to **reduce, reuse and recycle.**
